Investment Strategy

360 ONE Silver ETF is a passively managed fund which will employ an investment approach designed to track the performance of domestic price of Silver.

The Scheme will invest at least 95% of its total assets in the Silver or Silver related instruments. It may hold up to 5% of their total assets in debt or money market securities.

The Investment Manager would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible.

Risk Profile of the Scheme

Risk Profile of the Scheme Mutual Fund units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific risk factors are summarized below:

Risk specific to investing in securities forming part of Domestic Price of Physical Silver and risks:-

The Scheme will invest atleast 95% of its net assets in Silver (Includes Physical Silver and other Silver related instruments as permitted by SEBI from time to time). To the extent that the scheme may concentrate its investments in Silver and Silver related instruments, the Scheme will therefore be subject to the risks associated with such concentrations.

As per provision no. 3.2.7.1 read with provision no. 3.3.10.2 of SEBI Master Circular on Mutual Funds dated June 27, 2024, Market risk due to volatility in Silver prices: The value of the Units relates directly to the value of the underlying Silver held by the Scheme and fluctuations in the price of Silver could adversely affect the investment value of the Units. The price of Silver may fluctuate due to various factors such as: —

- 1) Global Silver supplies and demand, which is influenced by factors such as forward selling by Silver producers, purchases made by Silver producers to unwind Silver hedge positions, central bank purchases and sales, and productions and cost levels in major Silver producing countries such as the South Africa, the United States, Australia and China.
- Investor's expectations with respect to the rate of inflation.
- 3) Currency exchange rates.
- 4) Interest rates
- 5) Investment and trading activities of commodity funds/hedge funds.
- 6) Global or regional political, economic or financial events and situations

Risks associated with Silver

- Price fluctuations and Volatility: Mutual Funds, like Silver investments, are subject to market and other risks and there can be neither a
 guarantee against loss resulting from an investment in the Scheme nor any assurance that the objective of the Scheme will be achieved. The
 NAV of the Units issued under the Scheme can go up or down because of various factors that affect the capital market in general, such as, but
 not limited to, changes in interest rates, government policy and volatility in the capital markets. Pressure on the exchange rate of the Rupee
 may also affect security prices.
- Concentration / Sector Risk: When a Mutual Fund Scheme, by mandate, restricts its investments only to a particular sector; there arises a
 risk called concentration risk. If the sector, for any reason, fails to perform, the portfolio value will plummet and the Investment Manager will
 not be able to diversify the investment in any other sector.
- Liquidity Risks: Liquidity in investments in Silver may be affected by demand and currency fluctuation. These factors may also affect the
 Scheme's ability to make intended purchases/sales, cause potential losses to the Scheme and result in the Scheme missing certain
 investment opportunities. These factors can also affect the time taken by GMF for redemption of Units, which could be significant in the event
 of receipt of a very large number of redemption requests or very large value redemption requests. In view of this, redemption may be limited
 or suspended after approval from the Boards of Directors of the AMC and the Trustee, under certain circumstances as described in the
 Statement of Additional Information.

Risk associated with Investing in Debt and money market instruments: The performance of the Scheme may be affected by changes in macroeconomic factors such as Government policies, general levels of interest rates and risks associated with trading volumes, liquidity and settlement systems, etc.

Risk factors associated with processing of transaction in case of investors investing in mutual fund units through Stock Exchange Mechanism:

The trading mechanism introduced by the stock exchange(s) is configured to accept and process transactions for mutual fund units in both Physical and Demat Form. The allotment and/or redemption of Units through NSE and/or BSE or any other recognized stock exchange(s), on any Business Day will depend upon the modalities of processing viz. collection of application form, order processing / settlement, etc. upon which the Fund and the AMC have no control. Moreover, transactions conducted through the stock exchange mechanism shall be governed by the operating guidelines and directives issued by respective recognized stock exchange(s) upon which the Fund and the AMC have no control. Accordingly, there could be negative impacts to the investors such as delay or failure in allotment / redemption of Units. The Fund and the AMC are not responsible for the negative impacts.

For details on risk factors and risk mitigation measures, please refer SID.
