Pursuant to clause 12.25 of SEBI Master Circular dated June 27, 2024 and SEBI Letter to AMFI dated November 03, 2021, Cash or cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure. Cash Equivalent shall consist of the following securities having residual maturity of less than 91 days:

- a) Government Securities;
- b) T-Bills; and
- c) Repo on Government securities

Pending deployment of the funds as per the investment objective of the Scheme, the funds of the Scheme may be parked in short term deposits of the scheduled commercial banks, subject to the guidelines and limits specified by clause 12.16 and 4.5 of SEBI Master Circular dated June 27, 2024 as amended from time to time.

Timelines for deployment of Funds mobilized in a New Fund Offer (NFO)

The funds mobilized during the New Fund Offer (NFO) shall be deployed in accordance with the asset allocation pattern of the scheme within 30 business days from the date of allotment of units. In exceptional cases where the AMC is not able to deploy the funds within this period, shall provide an explanation, including details of the efforts made to deploy the funds, to the Investment Committee of the AMC.

The Investment Committee may, if deemed necessary, shall extend the deployment timeline by an additional 30 business days, in accordance with SEBI circular dated February 27, 2025. While granting an extension, the Committee shall examine the root cause of the delay. However, an extension shall not be granted if the scheme's assets are liquid and readily available.

Rebalancing due to Short Term Defensive Consideration:

Due to market conditions, the AMC may invest beyond the range set out in the asset allocation. Such deviations shall normally be for a short term and defensive considerations as per clause 1.14.1.2 (b) of SEBI Master Circular dated June 27, 2024, and the fund manager will rebalance the portfolio within 30 calendar days from the date of deviation.

Rebalancing due to Passive Breaches:

Further, as per clause 2.9 of SEBI Master Circular dated June 27, 2024 and SEBI Circular dated June 26, 2025, as may be amended from time to time, in the event of deviation from mandated asset allocation due to passive breaches (occurrence of instances not arising out of omission and commission of the AMC), the fund manager shall rebalance the portfolio of

	<p>the Scheme within 30 Business Days. In case the portfolio of the Scheme is not rebalanced within the period of 30 Business Days, justification in writing, including details of efforts taken to rebalance the portfolio shall be placed before the Investment Committee of the AMC. The Investment Committee, if it so desires, can extend the timeline for rebalancing up to sixty (60) Business Days from the date of completion of mandated rebalancing period. Further, in case the portfolio is not rebalanced within the aforementioned mandated plus extended timelines the AMC shall comply with the prescribed restrictions, the reporting and disclosure requirements as specified in clause 2.9 of SEBI Master Circular dated June 27, 2024.</p>
Investment Strategy	<p>The Scheme proposes to invest across asset classes, in line with the asset allocation mentioned in the SID, with the aim of generating capital appreciation and income for investors. With this aim the Fund Managers will allocate the assets of the Scheme predominantly in Equity & Equity related instruments, Debt & money market instruments, Commodities and in units of REITs & InvITs. The actual percentage of investment in other asset classes will be decided after considering the prevailing market conditions, the macroeconomic environment (including interest rates and inflation), the performance of the corporate sector, the equity markets and general liquidity and other considerations in the economy and markets.</p> <p>The Scheme may utilize an internal proprietary framework to monitor the markets to decide the asset allocation mix in various asset classes. The internal proprietary framework might be based on factors such as valuation, momentum and macroeconomic parameters.</p> <p>The AMC may choose to continuously churn the portfolio of the Scheme in order to achieve the investment objective. The Scheme proposes to concentrate on business and economic fundamentals driven by in depth research techniques, employing strong stock selection.</p> <p>Please refer SID for detailed investment strategy.</p>
Risk Profile of the Scheme	<p>Mutual Fund units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific risk factors are summarized below:</p> <p>Risks associated with investing in Equities: Investments in the equity shares of the Companies are subject to price fluctuation on daily basis. The volatility in the value of equity is due to various micro and macro economic factors like economic and political developments, changes in interest rates, etc. affecting the securities markets. This may have adverse impact on individual securities/sector and consequently on the NAV of Scheme.</p> <p>Risk associated with Investing in Debt and money market instruments: The performance of the Scheme may be affected by changes in macroeconomic factors such as Government policies, general levels of interest rates and risks associated with trading volumes, liquidity and settlement systems, etc.</p> <p>Interest Rate/Price risk: This risk is associated with movements in interest rate, which depend on various factors such as government borrowing, inflation, economic performance etc. The values of investments will appreciate/depreciate if the interest rates fall/rise. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices generally increase. The extent of fall or rise in the prices depends upon factors such as coupon, residual maturity of the security, micro and macroeconomic scenario as well as the yield level at which the security is being traded.</p> <p>Credit Risk/Default risk: Credit risk is the risk that the issuer of a debenture/ bond or a</p>

money market instrument may default on interest &/or principal payment obligations. This risk arises due to any uncertainty in counterparty's ability or willingness to meet its contractual obligations. Even when there is no default, the price of a security may change with expected changes in the credit rating of the issuer. Corporate bonds carry a higher credit risk than Government Securities.

Re-investment Risk: Investments in fixed income securities may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.

Spread Risk: In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. In the life of the security this spread may move adversely leading to loss in value of the portfolio. The yield of the underlying benchmark might not change, but the spread of the security over the underlying benchmark might increase leading to loss in value of the security.

Counterparty Risk: This is the risk of failure of counterparty to the transaction to deliver securities against consideration received or to pay consideration against securities delivered, in full or in part or as per the agreed specification. There could be losses to the scheme in case of counterparty default.

Risk factors associated with processing of transaction in case of investors investing in mutual fund units through Stock Exchange Mechanism:

The trading mechanism introduced by the stock exchange(s) is configured to accept and process transactions for mutual fund units in both Physical and Demat Form. The allotment and/or redemption of Units through NSE and/or BSE or any other recognized stock exchange(s), on any Business Day will depend upon the modalities of processing viz. collection of application form, order processing / settlement, etc. upon which the Fund and the AMC have no control. Moreover, transactions conducted through the stock exchange mechanism shall be governed by the operating guidelines and directives issued by respective recognized stock exchange(s) upon which the Fund and the AMC have no control. Accordingly, there could be negative impacts to the investors such as delay or failure in allotment / redemption of Units. The Fund and the AMC are not responsible for the negative impacts.

Risks associated with Investing/trading in Derivatives:

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of the fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

Risks associated with Securities Lending and Borrowing: Securities Lending and Borrowing ("SLB") is an exchange traded product in India, with trades done on order matching platforms setup by the clearing corporation/house of recognized stock exchanges. In accordance with SEBI guidelines, there is a robust risk management system and safeguards exercised by the clearing corporation/house, which also guarantee financial settlement hence eliminating counterparty risk on borrowers. The Scheme may participate as a lender in the SLB market and lend securities held in the portfolio for earning fees from such lending to enhance revenue of the Scheme.

	For details on risk factors and risk mitigation measures, please refer SID.
