Investment Strategy	<p>The Scheme will adopt a passive investment strategy. The scheme will invest in stocks comprising the Nifty 50 Index in the same proportion as in the Index with the objective of achieving returns equivalent to the Total Returns Index of Nifty 50 Index by minimizing the performance difference between the benchmark index and the scheme.</p> <p>Please refer SID for detailed investment strategy.</p>		
Risk Profile of the Scheme	<p>Mutual Fund units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific risk factors are summarized below:</p> <p>Risks associated with investing in Equities: Investments in the equity shares of the Companies are subject to price fluctuation on daily basis. The volatility in the value of equity is due to various micro and macro economic factors like economic and political developments, changes in interest rates, etc. affecting the securities markets. This may have adverse impact on individual securities/sector and consequently on the NAV of Scheme.</p> <p>Tracking Error Risk: The Fund Manager would not be able to invest the entire corpus exactly in the same proportion as in the underlying index due to certain factors such as the fees and expenses of the Scheme, corporate actions, cash balance and changes to the underlying index and regulatory restrictions, lack of liquidity which may result in Tracking Error. Hence it may affect AMC’s ability to achieve close correlation with the underlying index of the Scheme. The Scheme’s returns may therefore deviate from its underlying index. "Tracking Error" is defined as the standard deviation of the difference between daily returns of the underlying index and the NAV of the Scheme. The Fund Manager would monitor the Tracking Error of the Scheme on an ongoing basis and would seek to minimize the Tracking Error to the maximum extent possible. Tracking errors are inherent in any index fund and such errors may cause the scheme to generate returns which are not in line with the performance of the Nifty 50 Index or one or more securities covered by / included in the Nifty 50.</p> <p>Tracking Difference:</p>		

The tracking difference i.e. the annualized difference of daily returns between the Index and the NAV of the Scheme will be disclosed on the website of the AMC and AMFI, on a monthly basis, for tenures 1 year, 3 year, 5 year, 10 year and since the date of allotment of units.

Risk associated with Investing in Debt and money market instruments:

The performance of the Scheme may be affected by changes in macroeconomic factors such as Government policies, general levels of interest rates and risks associated with trading volumes, liquidity and settlement systems, etc.

Interest Rate/Price risk: This risk is associated with movements in interest rate, which depend on various factors such as government borrowing, inflation, economic performance etc. The values of investments will appreciate/depreciate if the interest rates fall/rise. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices generally increase. The extent of fall or rise in the prices depends upon factors such as coupon, residual maturity of the security, micro and macroeconomic scenario as well as the yield level at which the security is being traded.

Credit Risk/Default risk: Credit risk is the risk that the issuer of a debenture/ bond or a money market instrument may default on interest &/or principal payment obligations. This risk arises due to any uncertainty in counterparty's ability or willingness to meet its contractual obligations. Even when there is no default, the price of a security may change with expected changes in the credit rating of the issuer. Corporate bonds carry a higher credit risk than Government Securities.

Re-investment Risk: Investments in fixed income securities may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.

Spread Risk: In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. In the life of the security this spread may move adversely leading to loss in value of the portfolio. The yield of the underlying benchmark might not change, but the spread of the security over the underlying benchmark might increase leading to loss in value of the security.

Counterparty Risk: This is the risk of failure of counterparty to the transaction to deliver securities against consideration received or to pay consideration against securities delivered, in full or in part or as per the agreed specification. There could be losses to the scheme in case of counterparty default.

Risk factors associated with processing of transaction in case of investors investing in mutual fund units through Stock Exchange Mechanism:

The trading mechanism introduced by the stock exchange(s) is configured to accept and process transactions for mutual fund units in both Physical and Demat Form. The allotment and/or redemption of Units through NSE and/or BSE or any other recognized stock exchange(s), on any Business Day will depend upon the modalities of processing viz. collection of application form, order processing / settlement, etc. upon which the Fund and the AMC have no control. Moreover, transactions conducted through the stock exchange mechanism shall be governed by the operating guidelines and directives issued by respective recognized stock exchange(s) upon which the Fund and the AMC have no control. Accordingly, there could be negative impacts to the investors such as delay or failure in allotment / redemption of Units. The Fund and the AMC are not responsible for the negative impacts.

	<p>Risks associated with segregated portfolio:</p> <p>The unit holders may note that no redemption and subscription shall be allowed in the segregated portfolio. However, in order to facilitate exit to unit holders in the segregated portfolio, the AMC shall enable listing of units of segregated portfolio on the recognized stock exchange.</p> <p>For details on risk factors and risk mitigation measures, please refer SID.</p>
