# MONTHLY MARKET UPDATE

## Equity Market

India's equity markets underwent a time correction in 2025, failing to scale new highs during the year. Elevated valuations, a heavy supply of initial public offerings (IPOs), and continued selling by Foreign Portfolio Investors (FPIs) constrained market performance. Nonetheless, domestic investors continued to provide steady support to the markets.

The year also witnessed a clear policy shift by the Central Government. The government focused on reviving consumption rather than boosting capex, through revisions in income tax slabs, followed by a restructuring of the Goods and Services Tax (GST). This was further supported by the initiation of monetary policy easing by the Reserve Bank of India (RBI), with cumulative rate cuts of 125 basis points during the year. The RBI also injected substantial liquidity into the banking system to facilitate policy transmission.

Meanwhile, uncertainty surrounding US tariff policies continued to weigh on domestic markets. The US announced a higher-than-expected tariff rate of 50% on imports from India, and the anticipated trade deal failed to materialise in 2025. Geopolitical tensions also remained elevated, with rising strains between India and Pakistan following India's 'Operation Sindoor', which targeted terrorist infrastructure in Pakistan and Pakistan-occupied Kashmir.

The Nifty 50 and BSE Sensex indices posted returns of 10.5% and 9.1%, respectively, in 2025. However, the benchmark indices remained marginally down from their peak levels in September 2024. Broader market indices underperformed, with the BSE MidCap posting a modest gain of 1.1% during the year, while the BSE SmallCap witnessed a 6.6% correction.

Metals emerged as the top-performing sector in 2025, recording a 27.4% gain, followed by Auto, which posted a 21.1% increase. Defence and Finance also demonstrated strong performances, securing gains of 19.3% and 15.7%, respectively. On the other hand, Real Estate, IT, and Consumer Durables underperformed, with annual losses of 17.3%, 14.9%, and 6.9%, respectively.

### Indian Equity Markets: December 2025

India's benchmark equity indices remained largely range-bound during the month and ended with modest losses, as the US-India trade deal remained elusive and Foreign Portfolio Investors (FPIs) continued to be net sellers. Monetary policy easing by both the RBI and the Fed failed to uplift market sentiment.

The Nifty 50 and BSE Sensex indices posted monthly losses of 0.3% and 0.6%, respectively, in December 2025. FPIs were net sellers of US\$2.5 bn in December, while Domestic Institutional Investors (DII) bought US\$8.1 billion during the month.

Broader market indices also posted monthly losses, with the BSE MidCap declining by 0.5%, while the BSE SmallCap ended the month down 1.0%. Among sectoral indices, Metals, Auto, and IT outperformed, posting monthly gains of 7.9%, 1.3%, and 1.2%, respectively. In contrast, Defence, Consumer Durables, and Real Estate significantly underperformed, recording monthly losses of 3.3%, 3.0%, and 3.0%, respectively.

The RBI's Monetary Policy Committee (MPC) voted unanimously to reduce the policy repo rate by 25 bps to 5.25% in the December 2025 meeting. The policy stance remained unchanged at 'neutral'. The RBI also announced a liquidity infusion of Rs 1.45 trillion in December 2025 to facilitate monetary transmission. The RBI has revised the FY26 GDP growth projection to 7.3% YoY, up from 6.8% in the previous policy. Meanwhile, the inflation projection for FY26 was revised downward to 2.0% from 2.6%.

India's retail inflation rose to 0.71% YoY in November 2025 from a series low of 0.25% YoY in the previous month. Higher food prices primarily drove the uptick in inflation. Core inflation (which excludes food and fuel) remained flat at 4.4% YoY in November 2025.

Other key developments during the month included the FOMC's 25-bps reduction in the federal funds rate and the Bank of Japan's 25-bps increase in the benchmark interest rate. The Cabinet approved the Atomic Energy Bill, 2025. India and New Zealand also signed a free trade agreement.

### Outlook

Indian markets begin 2026 with a considerably stronger underlying position than in 2025. Macroeconomic headwinds have eased with accommodative monetary policy, income tax cuts, and GST reforms, while valuations have become more reasonable following a period of correction.

Corporate earnings also appear to have stabilised after quarters of downgrades, creating a healthier foundation for equity performance. Market returns in 2026 are likely to be driven by steady earnings visibility rather than valuation re-ratings, with resilient domestic flows providing stability. Foreign portfolio inflows are also poised to revive, supported by India's strong macroeconomic fundamentals, including a stable current account deficit, subdued inflation, and fiscal consolidation.

The economy's growth engine is transitioning from government-led capital spending toward private consumption, particularly discretionary segments. Multiple structural factors support a consumption rebound. Personal income tax cuts will increase household disposable income, thereby benefiting categories of discretionary spending. Inflation pressures have moderated significantly, further supporting consumption. Monetary accommodation and the RBI's relaxation of various banking norms also aim to accelerate credit expansion.

However, the global environment is expected to remain volatile with continued trade and tariff disputes, geopolitical conflicts and heightened economic uncertainty.

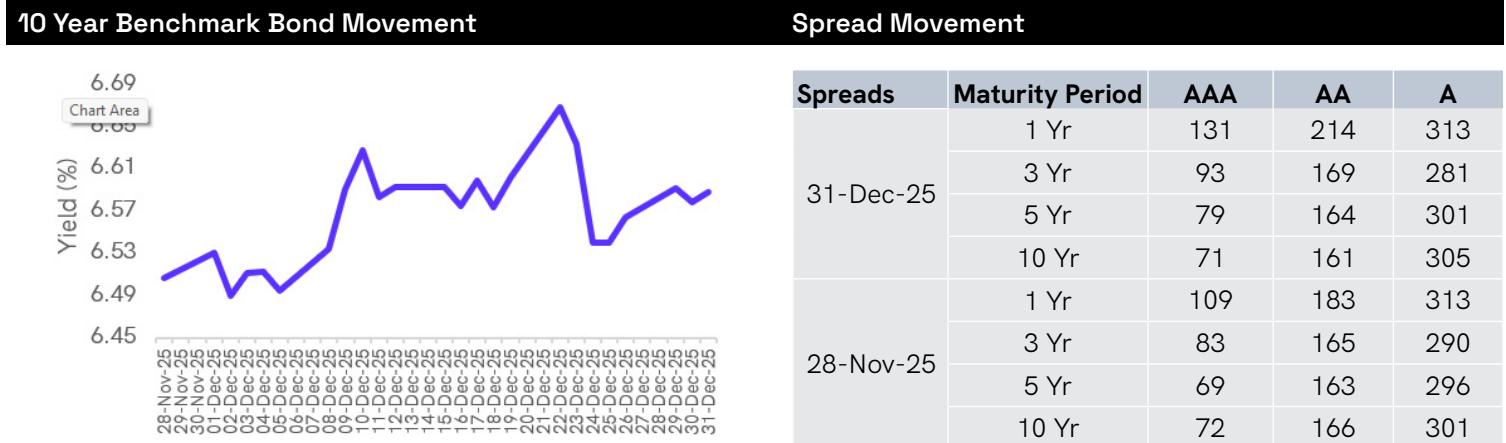

Given this backdrop, we prefer domestically focused sectors over those dependent on global dynamics, as internal fundamentals provide greater resilience amid international uncertainties. This strategic bias has shaped our positioning and continues to guide our investment approach.

Following approximately three years of value stock outperformance, growth leadership is likely shifting toward quality and growth factors. Our portfolio construction has reflected this evolution, with gradual reallocation from value toward quality and growth names.

# MONTHLY MARKET UPDATE

## Debt Market

Source: bloomberg

G-sec yields eased in early 2025 after the RBI's Monetary Policy Committee (MPC) initiated the rate-cut cycle with a 25-bps reduction in the February 2025 policy. This was followed by another 25-bps cut in April 2025, alongside a shift in the policy stance to 'accommodative'. Consequently, the 10-year G-sec yield declined from 6.78% at the beginning of 2025 to 6.25% by the end of May.

In June 2025, the RBI MPC announced a sharper 50 bps cut in the policy repo rate but reverted the policy stance to 'neutral' and signalled limited room for further easing. Following this announcement, the 10-year G-sec yield rose as markets repriced expectations of policy easing, reaching 6.62% by the end of August 2025.

The RBI kept the policy rate unchanged in its August and October policy meetings, while indicating scope for additional easing in the October review. The 10-year yield remained range-bound between 6.45% and 6.60% during September-December 2025. In the December policy, the RBI delivered another 25-bps rate cut; however, it failed to soothe the G-sec market, as participants increasingly believed the easing cycle was nearing its end.

The easing cycle was supported by subdued inflation. Inflation dropped to a series low of 0.25% YoY in October 2025. A correction in food inflation primarily drove the decline in inflation. Core inflation, however, remains elevated due to rising gold and silver prices. However, excluding gold and silver, even core inflation was subdued, indicating that underlying inflationary pressures remain low.

The RBI maintained ample liquidity conditions, which helped stabilise the debt market. The RBI conducted Open Market Operations (OMO) purchases totalling ~Rs 7 trillion during the year. This ensured that the banking system's liquidity remained in an adequate surplus, enabling the swift transmission of policy actions to credit and deposit markets.

Meanwhile, the supply of paper remained heavy. In FYTD26 up to 26 December, the Central Government gross borrowing stood at Rs 11.2 tn, compared with Rs 10.9 tn in the same period last year. State governments' gross borrowing amounted to Rs 7.2 tn, compared with Rs 6.1 tn last year.

## December 2025: Assessment and Outlook

### Macros:

India's retail inflation rose to 0.71% YoY in November 2025 from a series low of 0.25% YoY in the previous month. Higher food prices primarily drove the uptick in inflation. Food inflation increased to -2.8% YoY in November 2025 from -3.7% YoY in October. Within the food basket, vegetable inflation increased to -22.2% YoY from -27.6% YoY a month earlier. The increase in vegetable prices was the key driver behind the rise in headline CPI inflation. Core inflation (which excludes food and fuel) remained flat at 4.4% YoY in November 2025. Excluding gold and silver, core inflation was 2.4% YoY, indicating that underlying inflationary pressures remain low.

The RBI's Monetary Policy Committee (MPC) voted unanimously to reduce the policy repo rate by 25 bps to 5.25% in the December 2025 meeting. The MPC statement noted that headline inflation has eased significantly and is likely to be softer than earlier projections, primarily due to exceptionally benign food prices. It also highlighted that underlying inflation pressures are even lower than suggested by the headline and core inflation prints, as rising precious metal prices have lifted these. The RBI has revised the FY26 CPI inflation forecast to 2.0%, down from 2.6% in the previous policy. The RBI also announced a liquidity infusion of 1.45 trillion in December 2025 to facilitate monetary transmission. This was subsequently supplemented by an additional injection of approximately 2.9 trillion during December-January 2025.

During April-November 2025, direct tax collections recorded a muted expansion of 7.2% YoY, on account of 7.8% YoY growth in corporation tax. Income tax collections grew at a comparatively weaker 6.8% YoY. Indirect tax collections witnessed a contraction of 1.0% YoY. Non-tax revenues grew 20.9% YoY, driven by the higher RBI dividend of Rs 2.69 tn. Disinvestment proceeds were also higher, at Rs 237 bn, compared with Rs 89 bn in the same period last year. Total expenditure grew by 6.7% YoY, led by a 28.2% YoY rise in capital expenditure.

Credit growth increased to 12.0% YoY in mid-December 2025 from 11.5% in November. Deposit growth, on the other hand, decreased to 9.4% from 10.2% during the same period on account of RBI's FX interventions and advance tax collections.

# MONTHLY MARKET UPDATE

## Debt Market

### Local Markets:

The Indian sovereign bond market experienced a mixed trajectory in December 2025, with yields across the curve responding to both domestic policy easing and the looming threat of supply pressure. The 10-year yield touched a low of 6.49% immediately following the RBI's rate cut on December 5 but rose back toward 6.60% by the end of the month. While in corporate bonds the 10-year AAA spread at 42 bps remains relatively narrow compared to historical norms, supported by persistent demand from institutional investors like insurance companies and pension funds.

Local systemic liquidity tightened toward the end of December, with the daily banking system surplus falling to 614 billion by early January, compared to 1.78 trillion in November. The INR depreciated to record lows, breaching 91.08/\$, hedging costs rose sharply, and 10-year IGB yields hardened to around 6.68%. In response, the RBI announced additional liquidity support through INR 2 trln of OMOs and a USD 10 bln USD-INR buy-sell swap to contain upward pressure on yields. Since then, 10-year yields have moderated; however, with INR 1.5 trln of OMOs already executed and the first tranche of the buy-sell swap completed, market participants are now seeking incremental directional cues. In terms of events the budget remains the next event which is still a month away. In between we should see market muddle through within a small range only.

### Global:

The US Federal Open Market Committee (FOMC) lowered the federal funds rate by 25 bps to 3.50-3.75% at its December 2025 meeting. The Committee judged that reserve balances have declined to ample levels and will initiate purchases of shorter-term Treasury securities as needed to maintain an ample supply of reserves.

The Committee also raised its growth outlook, increasing the median projection for Q4 2026 GDP growth to 2.3%, up from 1.8% in the September Summary of Economic Projections. Inflation forecasts were revised lower. The core PCE inflation forecast for Q4 2026 was reduced to 2.5% from 2.6% in the September policy. Unemployment projections were broadly unchanged.

Chair Jerome Powell attributed the overshoot of the 2% inflation target to higher import tariffs. He noted that tariff-related inflation should peak in Q1 2026 and begin to moderate in the second half of the year. Powell emphasised that, in the near term, inflation risks are tilted to the upside while employment risks are tilted to the downside. He added that the Fed remains within a plausible range of neutral-rate estimates.

The Bank of Japan raised its policy rate by 25 bps to 0.75%, its highest level since 1995, in a unanimous decision, as the policy communiqué suggested an exit from monetary easing rather than tightening. Meanwhile, the European Central Bank (ECB) kept interest rates unchanged in line with market expectations, while improving forecasts for output and inflation. The Bank of England reduced its benchmark policy rate by 25 bps to 3.75%, with a 5-4 majority, on the back of a downward inflation trajectory, even as it remains above the 2% target. BOE Governor Bailey highlighted that future policy decisions would likely be "a close call".

### Outlook:

We expect Indian CPI to settle between 4.00% -4.15% in FY27. There could be some transitory spikes due to a lower base this year, expecting RBI to look through this technical factor and remain its growth-supportive stance, keeping liquidity accommodative and policy rates lower for longer. While adverse external developments could warrant incremental policy easing, this is not our base-case scenario and believe we are in a phase of lower rates for longer-time frame with active management by central bank.

We think yields will remain stable between due to lighter market positioning in long-end of the yield curve, Secondly RBI OMOs are providing some relief to the market even if they are not leading to a rally, RBI sale in FX continues which is partly offsetting the liquidity injection through OMOs. The possibility of OMOs in Feb and March remains due to this FX intervention. Thirdly, global rates are bound as well. Hence until these three conditions are holding market is not selling off in a big way as well. We still think 6.67-6.57 will hold for 10-year benchmark

Given India's inflation stability, credible fiscal path and supportive policy and liquidity stance, the risk-reward ratio continues to be appealing in the three-four-year segment. It continues to offer superior risk-adjusted accrual, lower volatility, favourable roll-down opportunities and reduced sensitivity to global yield-curve steepening. Apart from tactical opportunities at the long end based on market positioning and mispricing of yield curve, we remain moderate duration bias with selective credit exposure.

# MONTHLY MARKET UPDATE

## Precious metal outlook

### Gold -

Gold prices soared to historical highs, peaking above \$4584/oz in December before settling into a consolidation phase near \$4,300-\$4,450/oz beginning December. The rally followed strong central bank purchases, a weakening U.S. dollar, and the search for inflation hedges. Still, recent hawkish signals from the Federal Reserve.

Gold may be able to "hold higher" (i.e., a new floor) but upside may be more limited unless there's a big shock (e.g., major inflation, fiscal crisis, de-dollarisation).

### Factors supporting gold Prices -

- Aggressive central bank buying—especially by China and India—despite high prices
- Continued monetary accommodation. U.S GDP growth number is good but labour market is under pressure.
- Persistent inflation, geopolitical tension, and trade policy uncertainty under President Trump.

### Risks / headwinds

- If the Fed hikes rates or surprises to the upside on inflation, gold could face downward pressure.
- A strong U.S. dollar (due to economic recovery, rate differentials) would hurt gold's appeal.
- If investor sentiment shifts from safe-haven to risk-assets, demand could drop.

### Silver –

Silver broke its 14-year resistance at \$49.5 earlier in the year and surged past \$85/oz at its peak; prices remain elevated at \$70-\$75/oz. Silver's run was fuelled by rising industrial demand—especially from the solar and electronics sectors—combined with speculative interest and tight physical markets. Industrial demand has limited sharp corrections, though volatility remains high.

### Factors supporting silver prices.

- Structural supply deficits that continue to deepen.
- Strong industrial demand, particularly from solar and electronics sectors.
- Robust ETF inflows and renewed investment interest.

### Risks / headwinds

- Because silver has both safe-haven and industrial-commodity features, a drop in industrial demand could hurt it more than gold.
- If the dollar strengthens or interest rates rise, silver may be hit doubly (safe-haven appeal drops + industrial demand slows).

## Benchmark Risk-O-Meter

# 360 ONE FLEXICAP FUND

(An open - ended dynamic equity scheme investing across large cap, mid cap and small cap stocks)

## Investment Objective

The investment objective of the scheme is to generate long-term capital appreciation by primarily investing in equity and equity related securities across the entire market capitalization range and investing the remaining portion in debt and money market instruments. However, there can be no assurance or guarantee that the investment objective of the scheme would be achieved.

## Fund Manager **Mr. Mayur Patel**

Mr. Mayur Patel has 20 years of work experience including investment management and research experience of more than 18 years.

## Co-Fund Manager **Mr. Ashish Ongari**

Mr. Ashish has overall six years of experience in financial services, specializing in algorithmic trading and quantitative research. He holds a B.Tech from NITK, Surathkal, and has previously worked as a trader at Capitalmind and a quant analyst at Investmint. His expertise lies in factor investing, systematic trading, and portfolio optimization.

# 360 ONE ELSS TAX SAVER NIFTY 50 INDEX FUND

(An open-ended Passive Equity Linked Saving Scheme with a statutory lock-in period of 3 years and tax benefit, replicating/tracking the Nifty 50 index)

## Investment Objective

The investment objective of scheme is to invest in stocks comprising the Nifty 50 Index in the same proportion as in the Index to achieve returns equivalent to the Total Returns Index of Nifty 50 Index (subject to tracking error), while offering deduction on such investment made in the scheme under section 80C of the Income-tax Act, 1961. It also seeks to distribute income periodically depending on distributable surplus. There is no assurance or guarantee that the investment objective of the Scheme would be achieved. Investments in this scheme would be subject to a statutory lock-in of 3 years from the date of allotment to avail Section 80C benefits.

## Fund Manager Mr. Ashish Ongari

Mr. Ashish has overall six years of experience in financial services, specializing in algorithmic trading and quantitative research. He holds a B.Tech from NITK, Surathkal, and has previously worked as a trader at Capitalmind and a quant analyst at Investmint. IDCW Declared - Monthly IDCW Plan				
Date	Face Value (₹)	Gross IDCW (₹) (Per Unit)	Regular Plan NAV (₹) (Ex-IDCW)	Direct Plan NAV (₹) (Ex-IDCW)
30-Dec-25	10	0.05	12.9718	14.0306
25-Nov-25	10	0.05	13.0392	14.0961
28-Oct-25	10	0.05	12.9959	14.0425
<b>Quarterly IDCW Plan</b>				
04-Jun-15	10	0.40	11.4678	11.5708
<b>Half Yearly IDCW Plan</b>				
04-Jun-15	10	0.40	11.4678	11.5708

IDCW is gross IDCW. To arrive at the net IDCW payable for corporate and non-corporate investors applicable IDCW distribution tax, if any, needs to be adjusted respectively. Past performance may or may not be sustained in future. After payment of IDCW the NAV has fallen to the extent of payout and distribution taxes if applicable. Monthly IDCW is not assured and is subject to availability of distributable surplus.

Past performance may or may not be sustained in future. Different plans shall have different expense structure. Point to Point (PTP) returns in ₹ is based on standard investment of ₹10,000; Since Inception date is 24-June-2013; \* CRISIL Dynamic Bond A-III Index; \*\* CRISIL 10yr Gilt Index. Managed by the fund manager since 24-June 2013 and co-fund manager with effect from 06 October, 2025. The performance of the scheme is benchmarked to the Total Return variant of the Index.

THIS PRODUCT IS SUITABLE FOR INVESTORS WHO ARE SEEKING\*  
 • Income and long term gains  
 • Investment in a range of debt and money market instruments of various maturities

\*Investors should consult their financial advisers if in doubt about whether the product is suitable for them.

# 360 ONE LIQUID FUND

(An open-ended liquid scheme. A relatively low interest rate risk and moderate credit risk)

A1+ mfs  
by ICRA\*\*

asset  
360  
ONE

## Investment Objective

To provide liquidity with reasonable returns commensurate with low risk through a portfolio of money market and debt securities with residual maturity of up to 91 days. However, there can be no assurance that the investment objective of the scheme will be achieved.

## Fund Manager Mr. Milan Mody

Mr. Mody has over 20 years of work experience in the Fixed Income market.

## Co-Fund Manager Mr. Viral Mehta (w.e.f October 06, 2025)

Mr. Mehta brings experience across Credit and Equity. He began his career in Credit at Aditya Birla Capital and Axis Bank, honing his credit appraisal expertise, and later transitioned to Equity Research roles at PPFAS Mutual Fund and Edelweiss Global Wealth, deepening his skills in business analysis and financial modelling. This blend gives him a holistic market perspective, combining credit discipline with equity foresight.

# GLOSSARY

## POTENTIAL RISK CLASS OF A SCHEME

360 ONE Asset Management Limited has positioned its debt schemes in terms of PRC matrix consisting of parameters based on maximum interest rate risk (measured by Macaulay Duration of the scheme) and maximum credit risk (measured by Credit Risk Value of the scheme). Accordingly, the debt schemes of the Mutual Fund shall be placed in PRC matrix as follows:

Credit Risk of scheme → Interest Rate Risk of the Scheme ↓	Relatively Low (Class A)	Moderate (Class B)	Relatively High (Class C)
Relatively Low (Class I)	A-I 360 ONE Overnight Fund	B-I 360 ONE Liquid Fund	C-I NIL
Moderate (Class II)	A - II NIL	B - II NIL	C - I NIL
Relatively High (Class III)	A - III NIL	B - III NIL	C - III 360 ONE Dynamic Bond Fund

## GLOSSARY OF TERMS

FUND MANAGER	An employee of the asset management company such as a mutual fund or life insurer, who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.
APPLICATION AMOUNT FOR FRESH SUBSCRIPTION	This is the minimum investment amount for a new investor in a mutual fund scheme.
MINIMUM ADDITIONAL AMOUNT	This is the minimum investment amount for an existing investor in a mutual fund scheme.
YIELD TO MATURITY	The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.
SIP	SIP or systematic investment plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests ₹ 500 every 15th of the month in an equity fund for a period of three years.
NAV	The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.
BENCHMARK	A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE200, BSE500, 10-Year Gsec.
ENTRY LOAD	A mutual fund may have a sales charge or load at the time of entry and/or exit to compensate the distributor/agent. Entry load is charged at the time an investor purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is ₹ 100 and the entry load is 1%, the investor will enter the fund at ₹ 101.
EXIT LOAD	Exit load is charged at the time an investor redeems the units of a mutual fund. The exit load is deducted from the prevailing NAV at the time of redemption. For instance, if the NAV is ₹ 100 and the exit load is 1%, the redemption price would be ₹99 per unit.
MODIFIED DURATION	Modified duration is the price sensitivity and the percentage change in price for a unit change in yield.
STANDARD DEVIATION	Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, its means its range of performance is wide, implying greater volatility.
SHARPE RATIO	The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.
BETA	Beta is a measure of an investment's volatility vis-a-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.
R-SQUARED	R-squared measures the relationship between a portfolio and its benchmark index. It measures the correlation of the portfolio's returns to the benchmark's returns.
TREYNOR RATIO	Developed by Jack Treynor, the Treynor ratio (also known as the "reward-to-volatility ratio") attempts to measure how well an investment has compensated its investors given its level of risk. The Treynor ratio relies on beta, which measures an investment's sensitivity to market movements, to gauge risk.
AUM	AUM or assets under management refers to the recent I updated cumulative market value of investments managed by a mutual fund or any investment firm.
TRACKING ERROR	Means the annualized standard deviation of the difference in daily returns between the underlying index and the NAV of the Scheme.
TRACKING DIFFERENCE	Means the annualized difference of daily returns between the index and the NAV of the Scheme.
HOLDINGS	The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.
NATURE OF SCHEME	The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.
RATING PROFILE	Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.
IDCW	Dividend option is renamed as Income Distribution cum Capital Withdrawal (IDCW) option for all Schemes effective from April 1, 2021

Note: SEBI, vide circular dated June 30, 2009 has abolished entry load and mandated that the upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the service rendered by the distributor.
